RE: NEXT COVID BOOSTER

Public Health has recommended another follow up booster for vulnerable residents residing in long term care homes.

We will be providing this booster on May 18, 2023

At this time there is no recommendation/expectation for staff, essential caregivers or visitors to receive it. Everyone who wishes to receive an updated booster though is permitted to receive it, provided it has been 6 months since their last booster or COVID infection.

We will offer this booster to anyone that wishes to receive it. If interested, please let the office know by Friday, May 12, 2023.

The booster clinic on May 18 will run from 10am-1200pm and 1pm-3pm

Thank you
